Web Smart PoE Injector Hub

PC / Workstation
with
IE or Netscape Browser

RJ-45 / UTP Cable
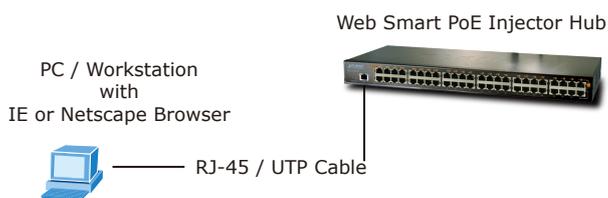

The following shows how to startup the Web Management of the PoE Injector Hub, please note the PoE Injector Hub is configured through an Ethernet connection, make sure the manager PC must be set on the same **IP subnet address**, for example, the default IP address of the PoE Injector Hub

is **192.168.0.100** (the factory-default IP address), then the manager PC should be set at 192.168.0.x (where x is a number between 1 and 254, except 100), and the default subnet mask is 255.255.255.0.

Use Internet Explorer 5.0 or above Web browser, enter default IP address **http://192.168.0.100**

To access the Web interface then the Web login screen appears in Figure 1

> Default IP Address: **192.168.0.100**
> Default Account: **admin**
> Default Password: **admin**

Note	The following screen based on POE-2400P4, for POE-1200 / POE-1200P2 / POE-2400 the display will be the same to POE-2400P4.

Figure 1. Web Login Screen of POE-2400P4

After entering the user name and password (default user name and password is **"admin"**) in login screen (Figure 1 appears). The Web main screen appears as Figure 2.

Figure 2. Web Main Screen of POE-2400P4

Now, you can use the Web management interface to continue the PoE Injector Hub management, please refer to the user manual for more.

Note	For security reason, please change and memorize the new password after this first setup.
